Genetic testing in Leonbergers

You have contributed samples to our research project, thank you very much. In the meantime we applied the recently developed DNA tests that allow the unequivocal diagnosis of LPN and LEMP carriers. Further details are given at: http://www.genetics.unibe.ch/services/index_eng.html

Lab ID	Dog	Kennel	Breeding ID	Chip ID	Sex	DOB	LPN1	LPN2	LEMP
LB4566	Noortje	Lions from D'es	LOSH 1155399	981100004075602	f	14.12.2014	N/N	N/N	N/N
LB5075	Princes Sissy	Lions from D'es	LOSH 1175198	981100004147175	f	28.08.2016	N/N	N/N	N/N
LB5077	Oeps	Lions from D'es	LOSH 1173768	981100004148499	f	17.12.2015	N/N	N/N	N/N
LB5078	Persilla	Lions from D'es	LOSH 1184600	981100004352304	f	28.08.2016	N/N	N/N	D/N

The diagnostic tests were carefully conducted using state-of-the-art methodology. Nevertheless, errors cannot be excluded with 100% probability, as there is for example always a very small possibility of novel unknown DNA mutations. We therefore cannot give a warranty on the accuracy of the results. Any liability for subsequent damages in the course of an incorrect test result is excluded.

Kind regards

Prof. Dr. Cord Drögemüller

The International Leonberger Union (ILU) wants to publish the LPN and LEMP genotypes. Therefore, ILU pleases you to e-mail this page to secretary@leonbergerunion.com or to send a hard copy to: International Leonberger Union, Hein Sibrijns, La Tissière, F-03130 Loddes.
