Genetic testing Leonberger Polyneuropathy LPN1

You have contributed samples to our research project. We applied a recently developed DNA test that allows the unequivocal diagnosis of LPN1 carriers. Further details are given on the information sheet at our web site
http://www.genetics.unibe.ch/compart/servsaldog/index_eng.html

Lab ID	Dog	Kennel	Breeding ID	Sex	DOB	LPN1 genotype
LB1433	Samson	Zielona Cieszyniarka	PKR II-93466	m	21.06.2007	N/N (free)
LB1434	Norse Saga	Zielona Cieszyniarka	PKR II-100865	f	09.04.2009	N/N (free)

The diagnostic test was carefully conducted using state of the art methodology. Nevertheless, errors cannot be excluded with 100% probability as there is for example always a very small possibility of novel unknown DNA mutations. We therefore cannot give a warranty or the like with the results. Any liability for consequent damages in the course of an incorrect test result is excluded.

Kind regards

Prof. Dr. Cord Drögemuller
